Backend Team Lead & Senior Backend Engineer | Team Leadership & Employee Development | 1+ Year Lido Contributor | System Architecture & Agile

Rostov-on-Don, Rostov, Russia

Summary

Backend Team Lead & Senior Backend Engineer with 8+ years of experience in high-load systems and Web3 infrastructure development.

Specializing in:

- Web3 infrastructure (~2 years at Lido)
- Development team leadership (up to 7 people)
- Employee development: juniors → middles, middles → seniors
- Technical interviewing and hiring (50+ interviews, 100% success)
- System architecture and API integrations
- AI/ML projects (LangChain, Neo4j, GraphRAG)

Key achievements:

- Increased team velocity by 30% as Team Lead
- Achieved 2x growth of technical teams through effective hiring
- Conducted 50+ technical interviews, hired 10 developers (100% probation completion)
- Three of 10 hired developers became team leads after probation
- Awarded "Discovery of 2024" for best growth from developer to team lead
- Top performer in three consecutive performance reviews
- Successfully launched 3 products simultaneously: licensing system, monitoring center, OPS integrations
- Led Agile/Scrum processes: sprints, retrospectives, sprint reviews
- 1+ year active contribution to Lido: main developer of diffyscan (139#), state-mate and gate-seals
- Led roadmap for on-chain infrastructure and DevOps processes at Lido

Tech stack: TypeScript, NestJS, Python, Go, C++, Java, Docker, Terraform, Prometheus, Web3 Tools (Ethers.js, Viem, Wagmi, Hardhat)

Current projects: diving into NLP, developing AI systems on LangChain, LangGraph, Neo4j, GraphRAG

AI expertise: efficiently parallelize work using background agents, MCP, selecting optimal models, crafting effective prompts

Open to relocation or full remote. Looking for new challenges in Web3 infrastructure, backend development and AI/ML projects.

Experience

Lido Finance

Technical Project Manager

March 2025 - August 2025 (6 months)

Rostov-on-Don, Rostov, Russia

- 1+ year active contribution to open-source projects: diffyscan, state-mate and gate-seals (external + official)
- Led roadmap and delivery for on-chain infrastructure
- Developed blockchain integrations (Ethereum)
- Created monitoring and DevOps process tools
- Wrote technical documentation and runbooks
- Programmed in TypeScript, Python, Vyper, Go

Laid off due to company restructuring (not performance-related) - new CEO eliminated experimental roles.

DSSL

Backend Team Lead

March 2023 - March 2025 (2 years 1 month)

Rostov-on-Don, Rostov, Russia

- Led team of 7 developers
- Increased team velocity by 30%
- Achieved 2x growth of technical teams
- Conducted 50+ technical interviews in 3 months, hired 10 developers
- 100% probation completion rate for hired developers
- Three of hired developers became team leads after probation completion
- Led architecture, code review, technical interviews

- Conducted 1:1 meetings and developed employees
- Monitored each employee's development: juniors became middles, middles became seniors
- Developed and worked with competency matrix for each employee
- Managed 3 products simultaneously with team: licensing system, monitoring center, OPS integrations with Honeywell and Perco
- Developed API SDK for external service integrations
- Conducted master classes for other team leads at HR request
- Led Agile/Scrum processes: sprints, quality retrospectives, sprint review presentations to business and tech teams
- Conducted RCA (Root Cause Analysis) for process improvement
- Established testing processes and QA team collaboration
- Organized regular code reviews and technical debt management
- Successful launch of all products, multiple team promotions

Research Institute

Software Engineer (C++/Embedded)

August 2016 - May 2023 (6 years 10 months)

- Designed and developed comprehensive power management systems for UAV applications
- STM32 microcontroller programming
- Qt5 GUI development
- Android app development for drones
- Embedded systems and real-time systems work

Education

Don State Technical University

Bachelor's degree in Information Systems and Environments · (September 2014 - May 2018)

Rostov College of Communications and Informatics

Software for Computer Systems, Programming in Computer Systems · (September 2010 - May 2014)
